

## WARNING LIGHT WITH BATTERY

Item #	EAN	Product
862388	3660338170881	Light and battery

### Description

Orange LED flashing light provided with a battery.  
360° multi-directional head.  
CE mark.

Automatically turns on thanks to its photoelectric cell: only turns on in the dark.

Power supply by 1 or 2 4R-25-6V batteries (1 battery included).

Provided with an access key to the battery compartment, a master key for turning on and off the device and a metallic support for fastening it. Transportation and fastening handle on the top.

### Applications

Maintenance, public works, various works, signalisation...

### Characteristics

- |                |  |
|----------------|--|
| - Power supply | 1 or 2 4R-25-6V batteries (1 included) |
| - Color        | Orange                                 |
| - Height       | 36 cm                                  |
| - Width        | 20 cm                                  |
| - Depth        | 11 cm                                  |

### Instructions

- For the first use or in case of battery change : open the battery compartment thanks to the included key (hexagonal key) by removing the black plastic bolt and then the black base of the light, set at least 1 4R-25-6V battery in one of the compartments and close the light
- If necessary, fasten the light on a support using the provided metallic parts
- Turn the head depending on the coming risks hazards (do not turn more than 10 complete rounds in order to avoid any pull out of the wires inside the light)
- Turn on the light by pushing in the right small hole on the front of the light thanks to the master key provided (thin plastic pin), a short flash confirming that the light has been turned on
- The light is on and will flash in the dark only
- After use, push again with the master key to turn off the light (a short flash confirming that the light has been turned off)
