Product:

Degree spirit level made of high-quality special casting, structurally lacquered with flat sole. The device is equipped with a 360° scale disc and allows easy adjustment of any inclined surfaces (also overhead). The support surface is finely ground. The device is equipped with a simple vial. This spirit level is equipped with two holes with lowering for screwing on M5 screws.

Technical information:

Length	mm	300
Width / Height	mm	25 / 95
Weight of the water scale	kg	1.06

Item No. 4730	X
---------------	---

(X = available)

Special version optional:
With magnets

Accessories:
Custom, robust plastic case for storage (4730/300/KK)

Additional service optional:
Measuring protocol

Working/storage temperature:

For precision mechanical spirit levels, the working temperature is 20°C (+/-5 K) and the storage temperature is -40°C to +70°C.

Reading:

2.0 mm/m = 0.1 degrees
(same distance of the air bubble to the left and right zero stroke)
(zero stroke of the scale disc exactly in the middle of the zero stroke of the housing)
